1200 CFM equipment	Call factory	Call factory	—
--------------------	--------------	--------------	---

Parts: BB2 & BB4-3K Electrical Options

Standard Wiring – BB2-3K and BB4-3K basket blasters are wired for a 230 volt, 60 hertz, three-phase electrical source.

IMPORTANT! Systems must be wired at the factory to match the customer's electrical supply. If the electrical supply at the installation site differs from 230V/60Hz/3Phase, specify the appropriate part number(s) shown below. Customer installed electrical options are not available with BB2-3K and BB4-3K basket blasters.

Part Numbers for Three-Phase Options

NOMINAL VOLTAGE/FREQUENCY	208V/60Hz	460V/60Hz	575V/60Hz	380V/50Hz*
	PART NUMBERS			
400 CFM/1 horsepower (BB2-3K only), single source, factory installed	140071	140074	140075	140073
600 CFM/1½ horsepower, single source, factory installed	140051	140054	140055	140053
900 CFM/2 horsepower, single source, factory installed	140091	140094	140095	140093

* 50 hertz systems with reclaimers may not convey heavier media, especially when using multiple guns, large nozzles and at high altitudes. Consult factory.

Part Numbers for Single-Phase Options

BB2-3K, 400 CFM/1 horsepower connection to 230V/60Hz/1Ph (3 wire) supply requires:	Part Number 141072
BB2-3K, 600 CFM/1½ horsepower connection to 230V/60Hz/1Ph (3 wire) supply requires:	Part Number 141052
BB4-3K, 600 CFM/1½ horsepower connection to 230V/60Hz/1Ph (3 wire) supply requires:	Part Number 141052

NOTES on Electrical Components

- If no electrical disconnect is provided, the customer is responsible for providing appropriate disconnecting means adjacent to this equipment for each incoming power circuit. Each disconnect shall be of a type and rating suitable for the application. Refer to current editions of the **National Electrical Code** (NFPA 70) and the **Electrical Standard for Industrial Machinery** (NFPA 79). Systems with a line cord plug do not require a disconnect.
- Interconnections between cabinet, dust collector and customer's utilities are to be supplied by installer.
- Electrical components cannot be returned to the factory for exchange.
- All standard systems are **three-wire** (3 phase conductors and a ground).
- Consult factory for other electrical options, for conformance with customer electrical specifications, or if you have questions.

See Operating Instructions for Proper Electrical Connections

Electrical connections at installation should be performed by a competent licensed electrician following local codes, standard safety procedures and proper installation instructions.

Never use silica sand in any Empire equipment.

Bag-House Dust Collector Options (Part Numbers)

Automatic bag shaker cleans bags thoroughly every time the system is turned off.

Electric shaker for all bag-house collectors, 115 volts

Pneumatic shaker for DCM-80 series collectors

Pneumatic shaker for DCM-200 series collectors

HEPA filter captures very fine particles.

DCM-80A

DCM-200 & DCM-200A

HEPA filter, pressure differential gauge assembly (magnetic)

Leg extension package for 16 gallon drum

DCM-80A

DCM-200 & DCM-200A

Leg extension package for 55 gallon drum

DCM-80A

DCM-200 & DCM-200A

Leg extension stand (only) for 16 gallon drum

DCM-80A

DCM-200 & DCM-200A

Leg extension stand (only) for 55 gallon drum

DCM-80A

DCM-200 & DCM-200A

Lid assembly for 16 gallon drum fits all Empire bag house collectors

Lid assembly for 55 gallon drum

DCM-80A

DCM-200 & DCM-200A

Manometer measures pressure differential

Minihelic gauge measures pressure differential

Sound attenuator reduces noise in the work place.

Attenuator/damper for DCM-80A & DCM-200

Attenuator/damper for DCM-200A

SuperSmooth dust bags handle severe dust loading

Options Details: BB2 & BB4-3K Cabinets

Cabinet Options

	PART NUMBERS																									
	FACTORY INSTALLED	CUSTOMER INSTALLED																								
Automatic blow off cycle removes dust and fines at the end of each blast cycle.																										
BB2-3K	140044	NA																								
BB4-3K	140034	NA																								
Basket end covers retain fly-away parts. (BB2 only)	140496	140496																								
Basket with 1/8" perforations handles smaller parts. (Deduct PN 510651 if factory installed.)																										
BB2-3K	767151	767151																								
BB4-3K	767141	767141																								
Basket with PVC coating improves durability. (Deduct PN 510651 if factory installed.)																										
BB2-3K	509281	509281																								
BB4-3K	509171	509171																								
End-of-cycle light indicates completion of blast cycle. (Must be purchased with automatic blow off .)	170051	NA																								
Magnetic separator removes ferrous debris during media recycling.	511572	511572																								
Rubber kick flights improve tumbling action, promote more even processing of parts.	140566	NA																								
Rubber curtains shield cabinet interior from harsh abrasives, prolong equipment life.																										
• Attaching these neoprene curtains requires 1/4-20 studs, brass grommets and rubber nuts (PN 523533).																										
Safety matting protects cabinet floors and workers. (Two-foot-wide safety matting, with pockets to catch spilled media, is sold by the linear foot. Fourteen feet required around cabinet. Specify total length required when ordering.)	509002	509002																								
Vibrating screen assures smooth flow of light and fine media.	140335	140419

Parts: BBO-1 & BBO-2 Electrical Options

Standard Wiring – BBO basket blasters are wired for a 115 volt, 60 hertz, single electrical source.

Optional Wiring – A factory installed transformer (**Part Number 139143 with dust collector or Part Number 139112 with dust bag**) is available for 208-240 volt, 50-60 hertz, single phase electrical sources with two or three wires.

IMPORTANT! Systems must be wired at the factory to match the customer's electrical supply.

NOTES on Electrical Components

- No electrical disconnect is provided. The customer is responsible for providing appropriate disconnecting means adjacent to this equipment for each incoming power circuit. Each disconnect shall be of a type and rating suitable for the application. Refer to current editions of the **National Electrical Code (NFPA 70)** and the **Electrical Standard for Industrial Machinery (NFPA 79)**. Systems with a line cord plug do not require a disconnect.
- Electrical components cannot be returned to the factory for exchange.

See Operating Instructions for Proper Electrical Connections

Electrical connections at installation should be performed by a competent licensed electrician following local codes, standard safety procedures and proper installation instructions.
